

BHAVIN BAVISHI

Senior .NET & Azure Developer | AI-Assisted Software Development

Email: bavishibhavin239@gmail.com

Mobile: +91 9723454128

Location: Rajkot, Gujarat, India

LinkedIn: [linkedin.com/in/bhavinbavishi](https://www.linkedin.com/in/bhavinbavishi)

Professional Summary

Senior .NET and Azure Developer with 11+ years of experience designing, developing, modernizing, and maintaining enterprise applications across e-commerce, marketplace, and payroll management domains.

Extensive experience in building scalable cloud-native solutions using .NET technologies and Microsoft Azure services, including Azure Functions, Logic Apps, Azure Storage, Cosmos DB, and SQL technologies.

Proven expertise in leading development teams, delivering large-scale modernization initiatives, migrating legacy applications to modern architectures, and implementing CI/CD practices to improve deployment efficiency and reliability. Strong background in Microservices Architecture, REST API development, Object-Oriented Design Principles, and Agile methodologies.

Experienced in AI-Assisted Software Development using ChatGPT, Claude, and Cursor to accelerate software delivery, generate technical and functional documentation, optimize and refactor code, support architectural decision-making, enable rapid prototyping through vibe coding and enhance team productivity through effective prompt engineering practices.

A collaborative technical leader passionate about continuous learning, mentoring teams, and delivering high-quality business solutions that drive organizational success.

Professional Experience

Gateway Group of Companies

Senior Analyst Developer (.NET + Azure) March 2024 – Present

Payroll System

A suite of enterprise applications used to manage employee payroll processing and related payroll operations.

Key Responsibilities

- Led modernization initiatives by migrating legacy .NET Framework and desktop applications to .NET 8.
- Designed and implemented migration strategies for cloud-based applications.
- Developed, maintained, and enhanced backend applications using Microsoft technologies.
- Conducted unit testing and ensured adherence to organizational coding standards.
- Implemented object-oriented design principles and design patterns.
- Managed change requests and coordinated delivery activities.
- Developed Azure Functions and Logic Apps to automate business processes.

- Designed end-to-end solutions to improve collaboration, productivity, and operational efficiency.
- Participated in architecture discussions, code reviews, and technical decision-making.
- Mentored and guided development team members to maintain development standards.

AI-Assisted Development Experience

Leveraged AI-powered development tools for:

- Technical and functional document generation.
- Code optimization and refactoring.
- Vibe coding and rapid prototyping.
- Generating implementation approaches and alternative solutions.
- Automating repetitive development activities to improve productivity.

Technologies: .NET 8, C#, Azure Functions, Azure App Services, Azure Storage, Azure APIM, REST APIs, Entity Framework, Angular, Azure DevOps, CI/CD, Micro services.

Methodology: Agile (Scrum & Kanban)

Achievements:

- Led and mentored a team of 7–8 developers.
- Driving enterprise modernization initiatives through cloud adoption.

Dhanashree Inc.

Senior .NET Developer (.NET + Azure) May 2017 – February 2024

E-Commerce Domain Platform

An e-commerce platform enabling brands and marketplaces to collaborate efficiently by structuring and managing product data according to marketplace requirements.

Key Responsibilities

- Designed and developed cloud-native applications using Azure serverless technologies.
- Built scalable solutions using microservices architecture.
- Developed Azure Functions, WebJobs, and integration workflows.
- Integrated multiple data sources including Azure SQL, MongoDB, and Cosmos DB.
- Developed and maintained RESTful APIs.
- Implemented CI/CD pipelines to streamline deployments and improve release quality.
- Optimized application performance and resolved production issues.
- Collaborated with cross-functional teams to deliver high-quality releases.
- Participated in system enhancements and continuous improvement initiatives.

Technologies: C#, .NET, Azure Functions, Azure SQL, MongoDB, Azure Cosmos DB, Azure Queue Storage, Azure Service Bus, REST APIs, Entity Framework, Azure DevOps, CI/CD, Micro services.

Methodology: Agile (Scrum & Kanban)

Achievements: Received client appreciation for leadership and successful project delivery.

S.G. Webtech

.NET Developer January 2015 – April 2017

Chat Application (Desktop Application)

- Developed one-to-one and group chat functionalities.
- Implemented file-sharing capabilities using XMPP libraries.

Technologies: C#, Windows Application, XMPP Library

Jewelry Software

- Developed reports and implemented enhancement requests.

Technologies: C#, Windows Application, DevExpress Controls

Casting and Stock Management Software

- Developed modules for purchase, sales, payments, stock management, and reporting.
- Created a portable application capable of running from USB devices with attached databases.

Technologies: C#, Windows Application, DevExpress Controls

Distributor and Dealer Web Application

- Developed Web APIs for Android applications.
- Implemented order history, payment processing, reporting, and rights management functionalities.

Technologies: ASP.NET, C#, Web API

CERTIFICATION

Scrum Fundamentals Certified

Microsoft Certified: Azure Developer Associate AZ-204

EDUCATION

Master in Computer Application

Gujarat Technological University

2013 - 2015,

7.40

Bachelors's in Computer Application

Saurashtra University

2010 - 2013,

77%

LANGUAGES

English, Gujarati. Hindi
